TANDHAN POLYPLAST

SABKA BHAROSA SUPERHIT SURAKSHA

ABOUT US

Nestled in a vast 200,000 square foot facility, our factory epitomizes relentless productivity and precision craftsmanship. From dawn till dusk, our devoted team ensures every inch buzzes with activity, fueled by our unwavering pursuit of excellence. Here, cutting-edge machinery and innovation come together to produce a variety of top-quality plastic products, including tarps, shed nets, and protective covers, all meticulously crafted to exceed industry standards. Welcome to a factory where size meets sophistication, and the quest for perfection knows no limits.

COMMITMENT TO QUALITY

- ❏ We uphold the highest standards of quality in our factory.
- ❏ Products are exclusively manufactured using virgin materials.
- ❏ Only the finest raw materials are used to ensure premium quality.
- ❏ Our products exceed industry benchmarks for durability, reliability, and performance.

SKILLED MANPOWER

- ❏ We pride ourselves on our skilled labor force, the cornerstone of our operations.
- ❏ Our dedicated professionals bring expertise and commitment to every aspect of manufacturing.
- ❏ They ensure top-quality products through their skilled workmanship.
- ❏ Their unwavering dedication to excellence drives our success.

ECOPAULIN STAR

Advance Super Cross Laminated Multilayer Tarpaulin. The strongest tarpaulin in industry!

Ecopaulin Star is a next-generation, super strong cross-laminated tarpaulin engineered for unmatched strength, weather resistance, and long-lasting performance. Its criss-cross multi-layered design makes it the toughest and most reliable tarpaulin in the industry.

Benefits:

1. Exceptional durability.
2. Weather resistance.
3. Long lifespan.
4. Easy installation.
5. Versatile.

Application:

1. Construction.
2. Agriculture.
3. Logistics.
4. Event management.

ECOPAULIN

Premium quality Cross Laminated Multilayer Tarpaulin. Solution for all your Tarp issues!

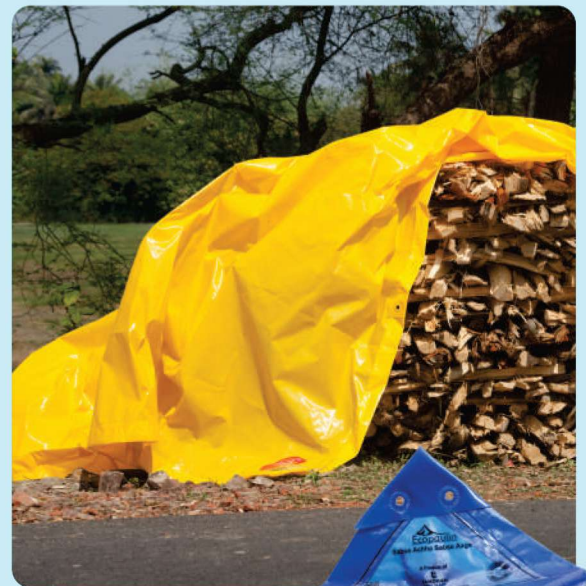

The Ultimate Eco-Friendly Tarpaulin Solution
Ecopaulin is a next-generation, multi-layered cross-laminated tarpaulin designed to deliver unmatched strength, flexibility, and sustainability. Crafted with advanced technology and precision manufacturing, it redefines industry standards for durability, performance, and eco-conscious

Benefits:

1. Cost-Effective.
2. Environmentally Responsible.
3. Enhanced Safety.

Application:

1. Construction.
2. Industrial.
3. Agricultural.
4. Event Management.
5. Home Improvement.

ECORAKSHA LINING

A pocket-friendly Multilayer Tarpaulin, designed to cater to your basic tarp needs!

Ecoraksha Lining is a high-performance, multi-layered tarpaulin crafted for superior durability and long-lasting protection. Built with advanced technology, it delivers reliable performance across a wide range of demanding applications.

Benefits:

1. Long-Lasting Protection.
2. Cost-Effective.
3. Easy Installation.
4. Environmentally Responsible.
5. Enhanced Safety.

Application:

TANDHAN TARPAULIN SUPER PREMIUM

Super Premium Multi-layered Tarpaulin

A next-gen, multi-layered tarpaulin designed to redefine protection with its advanced dual lamination technology. Featuring a unique bisectional lamination structure, it offers enhanced strength, superior durability, and long-lasting performance across demanding applications.

Benefits:

1. Long-lasting protection.
2. Reliable performance.
3. Easy to clean and maintain.

Application:

1. Construction sites.
2. Camping and outdoor activities.
3. Agricultural protection.
4. Industrial storage.

ECORAKSHA GOLD

Ecoraksha Gold is a high-performance, heavy-duty tarpaulin built for unmatched strength and reliability. Crafted with superior materials and advanced technology, it ensures exceptional protection in the most demanding conditions.

Benefits:

1. Unmatched durability & longevity.
2. Enhanced protection.
3. Cost-effective solution
4. Easy installation, maintenance, & repair.
5. Environment friendly.

ECOPACK

Polythene Films and Tarpaulins

Manufacture a wide range of polythene films, from narrow to wide widths, for agriculture, water management, the brick industry, and more. Offer a cost-effective range of high-quality polythene films and tarpaulins. Supported by strong infrastructure and strict quality control measures. Provide highly durable and consistent tarpaulins.

Benefits:

1. UV Stabilized
2. Durable & Strong
3. Flexible & Easy to Use
4. Cost-Effective

Application:

1. Agriculture
2. Water Management
3. Construction
4. Industry Transportation

EcoShakti STAR

PREMIUM HDPE TARPAULIN

EcoShakti Star is the reinforced evolution of the EcoShakti range, designed for greater strength, longer life, and higher performance in demanding agricultural and industrial applications.

APPLICATIONS

- Fumigation covers
- Poultry curtains
- Temporary and semi-permanent shelters
- Truck and transport covers

BENEFITS

- Stronger protection
- Handles heavier loads
- Longer service life outdoors
- Reduced replacement

FEATURES

EcoShakti

HDPE TARPAULIN

EcoShakti is a range of high-performance, UV-stabilized woven-coated tarpaulins by Tandhan Polyplast, designed to provide reliable waterproof protection for agricultural and industrial assets against heavy rain and harsh sunlight.

APPLICATIONS

- Tarpaulin covers
- Fumigation covers
- Poultry curtains
- Temporary shelters

BENEFITS

- Complete rain protection
- High tear and load strength
- Long outdoor life
- Lower replacement cost

MULCHING SHEET

Mulching is an effective way of insulating and protecting delicate plant root systems against harsh weather conditions. It works as a barrier that improves the soil's nutrient profile and enhances the microbial activity. Mulching also reduces erosion while enhancing the soil's ability to hold more moisture.

Benefits:

1. Weed suppression.
2. Water retention / moisture conservation.
3. Temperature regulation.
4. Protects against pests & diseases.
5. Improved crop quality & yield.
6. Reduced soil erosion.

Application:

1. Greenhouses & polyhouses.
2. Nursery plantations.
3. Orchards & vineyards.
4. Landscaping & gardening.

GEOMEMBRANE

Geomembranes are high-strength polyethylene sheets made from premium PE granules and UV-stabilized black masterbatch. Engineered for durability and weather resistance, these robust black liners are ideal for a wide range of industrial and environmental applications.

Benefits:

1. Durable Protection.
2. Versatile Applications.
3. Flexible Installation.
4. UV Protection.

Application:

1. Water reservoirs.
2. Landfills to prevent contamination.
3. Irrigation Canals.
4. Mining Operations.
5. Highways and Dams.
6. Aquaculture.
7. Ash Dykes.

SHADE NET (TAPE-TAPE)

The Tape-Tape Shade Net is a high-quality protective covering designed to control temperature, humidity, and light levels in greenhouses and net houses. It safeguards crops from harsh weather and prevents pest intrusion, ensuring healthier plant growth and better yield.

Benefits:

1. Controls climate conditions.
2. Protects from bad weather.
3. Prevents pest intrusion.
4. Promotes healthy growth.
5. Long-lasting & UV stable.

Application:

1. Greenhouses & net houses.
2. Nurseries & plantations.
3. Vegetable & fruit farms.
4. Livestock & poultry shade.
5. Garden & parking shade.

EcoGreen
SHADE NET

SHADE NET (MONO-MONO)

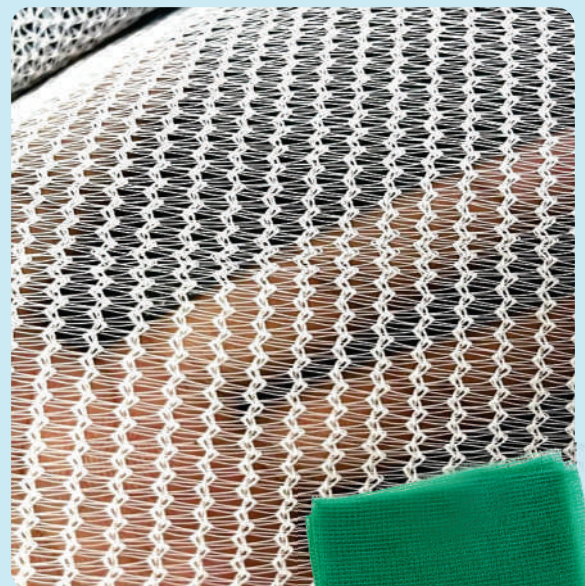

The Mono-Mono Shade Net is engineered with premium monofilament yarns, offering superior strength, flexibility, and UV protection. Designed to manage sunlight penetration and prevent sunburn. It ensures healthier plant growth while also serving as a stylish and functional shade solution for various outdoor uses.

Benefits:

1. High tensile durability.
2. Excellent UV protection.
3. Maintains uniform light spread.
4. Lightweight yet strong design.
5. Resistant to wear & tear.

Application:

1. Agricultural shading structures.
2. Terrace & balcony covers.
3. Horticulture & floriculture.
4. Sports grounds & nurseries.
5. Outdoor seating & patios.

EcoGreen
SHADE NET

INSECT NET

Insect Net is a reliable solution to protect crops from small insects like aphids and whiteflies. Designed with a precise mesh structure, it ensures effective pest control while allowing optimal airflow and light penetration. Its strong build and long UV life support healthier crop growth and reduce the need for chemical treatments. Easy to install and highly versatile, it is suitable for greenhouses, nurseries, orchards, and shade structures.

Benefits:

1. Pest Exclusion
2. Disease Prevention
3. Improved Yield and Quality
4. Climate Control

Application:

1. Greenhouses & Net Houses
2. Field Crops and Orchard Protection
3. Organic Farming
4. Seed Production

Available Mesh Size: 30 Mesh / 40 Mesh. Roll Width Size: 1.5, 3, 4.2, 3.6, 5.2 mtr, etc

ANTI-HAIL NET

Made from high-density polyethylene with UV protection. Prevents hail damage while allowing light through its transparent color. Flexible, lightweight, strong, and easy to install. Suitable for simple structures and fully recyclable.

Benefits:

1. Protects Crops from Hail
2. Damage UV Stabilized
3. Allows Light Transmission
4. Lightweight & Flexible

Application:

1. Apple Orchards
2. Horticultural Crops
3. Vineyards Vegetable Farms
4. Nurseries & Plantations

WEED MAT

Smart Farming Starts Here

Weed Mat (or landscape fabric) are synthetic sheets, usually made of polypropylene or polyester, that block sunlight and air to prevent weed growth. Laid over soil and covered with mulch, they allow water and nutrients to pass through while stopping weeds from sprouting.

Benefits:

1. Suppresses Weed Growth
2. Moisture Retention
3. Soil Temperature Control
4. Improves Yield

Application:

1. Agricultural farms (vegetables, fruits, flowers).
2. Greenhouses and polyhouses.
3. Nursery plantations.
4. Landscape gardens and lawns.
5. Vineyards and orchards.
6. Pathways and walkways.

UV FILM

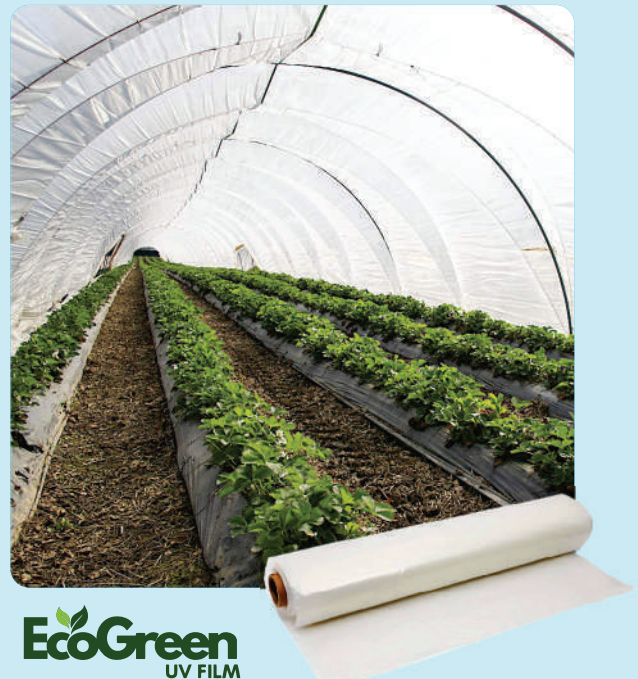

Our specially formulated UV Greenhouse Film offers superior protection, climate control, and light diffusion to ensure optimal crop growth all year round. Designed for Indian agriculture and greenhouse needs.

Benefits:

1. Enhanced Climate Control.
2. Improved Crop Health (UV Protection, Light Management, Anti-Drip/Anti-Mist).
3. Increased Yield & Profitability.
4. Durability and Longevity.
5. Pest Control.

Application:

1. Polyhouse Farming Floriculture.
2. Vegetable Cultivation.
3. Nursery Protection.
4. Hydroponics & Vertical Farms.

VEHICLE COVERS

Protect your vehicles with our top-tier tarpaulin covers tailored for cars, bikes, motorcycles, trucks, and cycles. Crafted for durability and weather resistance, our covers ensure reliable protection against the elements, keeping your vehicles in pristine condition. Choose enduring quality - safeguard your investments with our versatile and resilient vehicle covers.

VERMI BED

A vermibed is a specially designed structure used for vermicomposting, where earthworms convert organic waste into nutrient-rich compost. It's durable, breathable, and easy to install, providing the right environment for faster, hygienic composting.

Benefits:

1. Eco-Friendly.
2. Leak-Proof & Durable.
3. Quick Setup.
4. Better Aeration.
5. Strong & Resistant.
6. Improve Soil Health
7. Cost-Effective.

Application:

1. Organic Farming.
2. Home & Terrace Gardening.
3. Horticulture & Floriculture.
4. Nurseries & Plantations Waste.

FUMIGATION COVER

Fumigation covers are designed for maximum gas retention, making them highly effective in pest control for stored grains and crops. Made from high-quality materials in multiple GSM options, they are durable, weather-resistant and widely trusted by farmers, traders and agri-businesses across the country for safe and long-lasting protection.

Benefits:

1. Gas Retention.
2. Pest Control.
3. Durable.
4. Weather-Proof.
5. Cost-Effective.
6. Preferred nationwide.
